

DemoERPApi Customer API Test Plan

Generated from the supplied controller, Swagger definition, and xUnit integration tests.

Scope

Validate JWT login and CRUD Customer endpoints.

Base URL

https://localhost:7087

Authentication

POST /api/Auth/login then use Authorization: Bearer .

Endpoints

POST /api/Customer/sync
GET /api/Customer/{customerId}
PUT /api/Customer/update
DELETE /api/Customer/{customerId}

Validation

CustomerId, FirstName and Email required. Email format validated. Phone optional; if provided must be exactly 10 digits.

Execution Order

Login → Sync → Get → Update → Delete → Validation tests.

Test	Scenario	Expected
TC01	Login valid	200
TC02	Sync valid	200
TC03	Sync duplicate	409
TC04	Sync missing CustomerId	400
TC05	Get existing	200
TC06	Get missing	404
TC07	Update valid	200
TC08	Update invalid email	400
TC09	Delete existing	200
TC10	Delete missing	404
